3. ☐ At least one amendment has been filed subsequent to the final rejection, and the brief does not contain a statement of the status of each such amendment (37 CFR 41.37(c)(1)(iv)).
4. ☒ (a) The brief does not contain a concise explanation of the subject matter defined in each of the independent claims involved in the appeal, referring to the specification by page and line number and to the drawings, if any, by reference characters; and/or (b) the brief fails to: (1) identify, for each independent claim involved in the appeal and for each dependent claim argued separately, every means plus function and step plus function under 35 U.S.C. 112, sixth paragraph, and/or (2) set forth the structure, material, or acts described in the specification as corresponding to each claimed function with reference to the specification by page and line number, and to the drawings, if any, by reference characters (37 CFR 41.37(c)(1)(v)).

Continuation of 10. Other (including any explanation in support of the above items): On pages 8-9 of the appeal brief, Appellant does not provide a concise explanation of each of the independent claims involved in the appeal with reference to the specification by page and line number. Appellant, on the other hand, cited one general section (page 14, line 11-page 15, line 12, figure 4, all blocks) to refer to all the claim limitations of the independent claims. Therefore, a concise explanation is not provided with reference to page and line number. In addition, the brief fails to identify for each independent claim and dependent claim argued separately every means plus function and step plus function under 35 USC 112, sixth paragraph and set forth the structure, material or acts described in the specification as corresponding to each claimed function with reference to the specification by page and line number and to the drawings if any by reference characters. Appellant, on the other hand, made a general allegation that all the means plus function and structure corresponding to each and means for elements is described at specification on page 6, line 28 to page 9, line 24 and character 200 in figure 2 (char 200 is a data processing system).
